PINK IS THE NEW BLACK ON THE FARM

This year we're helping to raise awareness for breast cancer charities by wrapping many of our silage bales in a pink wrap. The Breast Cancer Campaign get a donation for every roll of wrap that we use.

SUMMER FEED

There's quite an art to farming. It's not just a case of turning the cows out into a field and leaving them to it. To ensure that our milking herd always eat the most nutritious food we use a hand-held device to accurately measure the volume of the grass to the square metre then transfer the data to a computer in order to ascertain which of our fields to let the cows graze the following morning.

WINTER FEED

We're constantly building up a bank of food to see our cows through the winter months. Its called silage and to make it we cut lush green grass, clover and lucerne, wilt it to reduce the moisture and then ensile it under plastic to exclude any air and preserve it for winter feeding. It's a kind of pickled grass and the cows love it!

PRETTIEST COW

Having produced over 36,000 litres of milk and her sixth calf due in August, Roxanne, one of our brown Swiss cows, is taking a well earned rest. She has just been classified by the brown Swiss cattle society as excellent (92 points out of a possible 100) which makes her one of the prettiest cattle in the UK.

Kind regards,

Lyndon, Maria, Harriet & our award winning team
