GIFT VOUCHERS

ON THE FARM

Because we rely on only traditional natural remedies it means that antibiotics will never be present in our milk. To promote digestion and the health of our herd we add Kefir to the milk that we feed our calves.

The various types of beneficial microbiota it contains makes it one of the most potent probiotic foods available and our calves thrive on it. The unpredictable weather this year has really hampered our cutting the grass for storage so that we can use it to feed the animals through the winter months. We lost half of our final cut of the year last month because it never had a chance to dry out enough to store.

Kind regards,

Lyndon, Maria, Harriet & our award winning team
